January 2025

CYBERSECURITY MATURITY MODEL CERTIFICATION (CMMC) UPDATE

January 2025

Core Business Solutions Overview

- Been in Business for 25 years
- Expert consultants from industry
- American owned and operated, we are committed to strengthening and improving America's small businesses.
- Heavily invested in understanding Government Contract requirements around industry standards
- If you are searching for an affordable, convenient, and simplified approach to compliance, we can help.

Overview and Status of CMMC

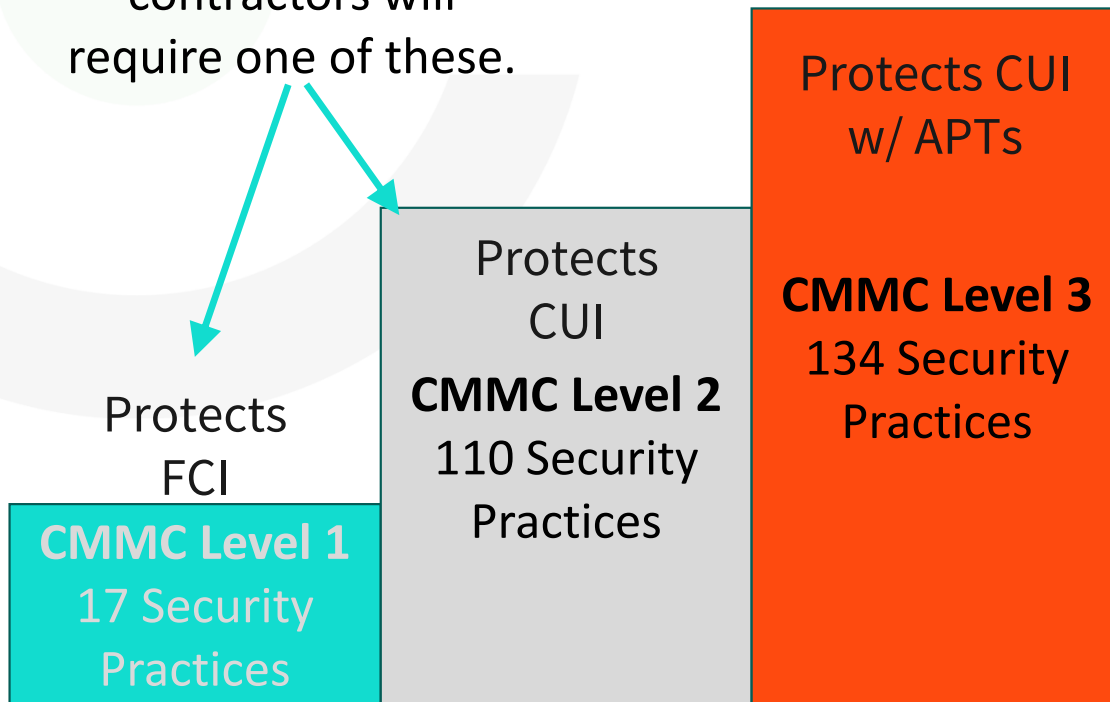

- CMMC program is now live in 2025
- CMMC contract rule should be in effect by mid 2025
- CMMC contracts contain CMMC requirements over the next 4 years (rollout)

	Rule Published	Public Comments	OIRA Approval	Published in Fed Register	Effective Date
32 CFR–CMMC Program Rule	Dec 23	✓	✓	✓	Dec 16, 2024
48 CFR–CMMC Contracts Rule	Aug 24	✓	Early 2025	Mid 2025	

CMMC Program Levels

Most defense contractors will require one of these.

CMMC = Cybersecurity Maturity Model Certification

FCI = Federal Contract Information

CUI = Controlled Unclassified Information

CMMC Level 1 Self-Assessments

Requirement	Self-assessment is allowed for Level 1*
Certification Process	Organizations can self-certify their compliance with CMMC Level 1 annually.
Focus	Basic cybersecurity hygiene practices to protect FCI.
Attestation	Executive affirmation submitted into SPRS annually through life of the contract.

*Unless you are a supplier that has been requested to be certified at CMMC Level 2, regardless.

CMMC Level 2 Needs Certification by C3PAO

Requirement	External 3rd-party assessments are *mandatory for Level 2.
Certification Process	Companies are assessed by Certified 3rd-Party Assessment Organizations (C3PAOs) every 3 years.
Process	Steps in the 3rd-party assessment process for CMMC Level 2.
Attestation	Executive affirmation submitted into SPRS annually through life of the contract.

* A small number of Level 2 certifications will allow for self-assessments.

Companies handling CUI – CMMC Level 2

- Need CMMC Certification every 3 years by C3PAO
- Need to enter SPRS score annually during active contracts
- Need to maintain CMMC Compliance for handling of CUI throughout the government contract period.

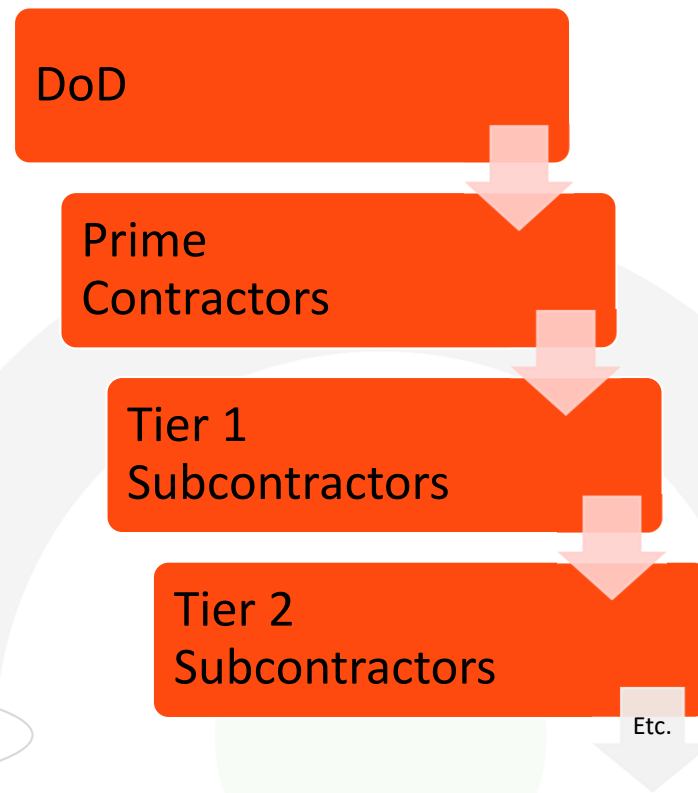

CMMC

Compliance and Flow-Down Requirements

- **Flow-Down:** Prime contractors must ensure subcontractors also comply with CMMC.
 - DFARS flows to all supplier tiers before contract award.
- **Annual Affirmation of Compliance:** Contractors must submit and validate affirmations in the Supplier Performance Risk System (SPRS).
- **Subcontractor Impact:** Non-compliance of subcontractors can affect the prime contractor's eligibility.
 - Non-compliance can lead to False Claims Act violations or contract cancellation!!

Impact on Business and Next Steps

- **Contract Eligibility:** CMMC certification is necessary for winning or renewing DoD contracts for Level 2 and Level 3.
- **Non-Compliance Consequences:** Risk of contract termination or ineligibility for renewals.
- **Preparation:** Contractors should determine their required CMMC level, conduct self-assessments, and ensure subcontractor compliance.

If you are CMMC Level 2 Then CMMC Scope Matters:

Scope: The breadth or boundary of the CMMC assessment

- Includes computers, devices, people, and physical areas involved in handling CUI.

Importance:

- Smaller scope reduces the cost and complexity of CMMC compliance.

Simplify CMMC Level 2 Compliance

The CORE Vault, a cloud-based CUI enclave solution

What is CORE Vault?

- CORE Vault is a cloud-based enclave for storing and transmitting Controlled Unclassified Information (CUI) and Federal Contract Information (FCI).
- Designed to meet NIST SP 800-171/CMMC Level 2 requirements without overhauling your entire network.

Comply with 82 of 110 CMMC requirements.

14 Security Policy Templates

Meet 100% of CMMC Requirements, Certification ready.

CORE Vault Features

Virtual Desktop Infrastructure (VDI) with 100 GB encrypted storage

Hosted in FedRAMP authorized environments

MS Office GCC High

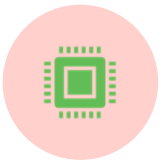

Secure Encrypted Email

Network Security (firewalls, IDS/IPS)

FIPS 140-2 Validated Encryption

SIEM/SOC (24x7 Security Operations Center)

Multifactor Authentication (MFA)

Segregated Backup and Recovery

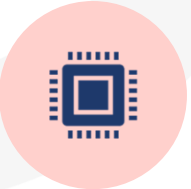

Additional Vault Security Features

Vulnerability Scanning

Web Filtering

Antivirus/Endpoint Detection and Response (EDR)

Secure Encrypted File Sharing

Data Loss Prevention (DLP)

Incident Response Support

Why Choose CORE Vault?

Quick deployment
(in days)

Flexible and scalable

Minimizes
disruptions to
existing operations

Share compliance
responsibilities

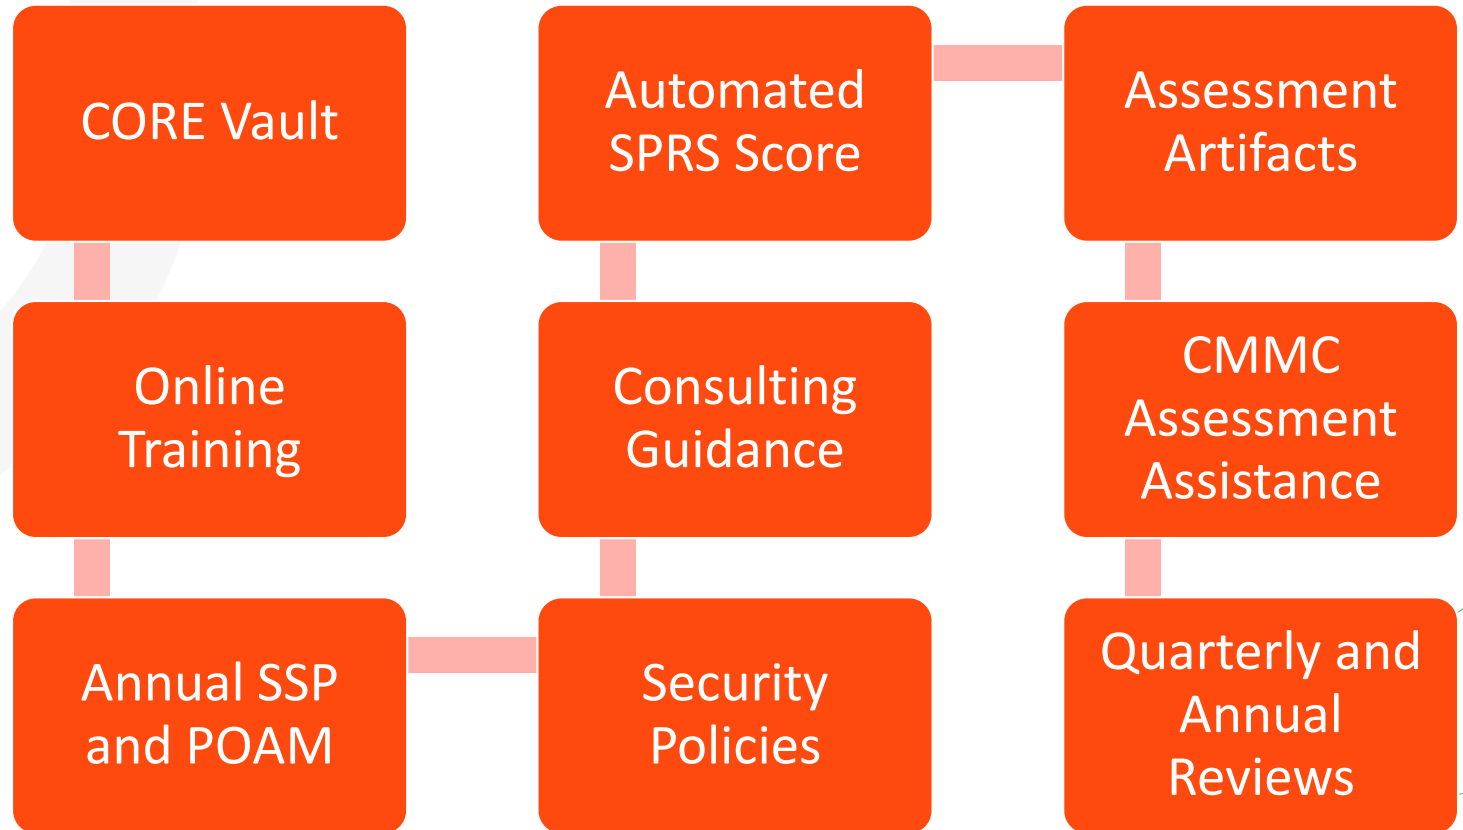

Affordable

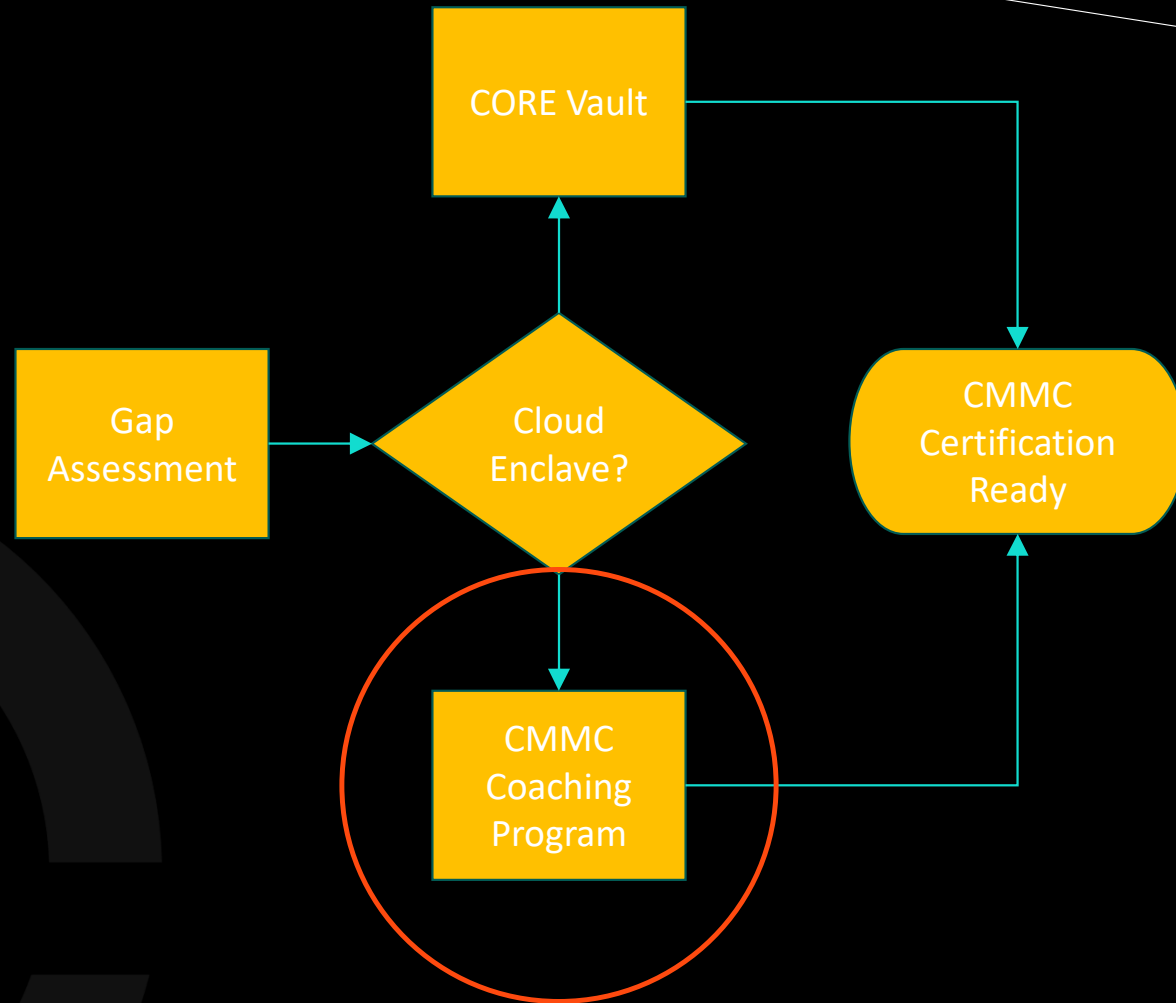

Easy button for
CMMC

Full-Service Compliance Support

CUI Enclave Alternative

CMMC Coaching Program

This program offers a dedicated consultant for guidance with your initial assessment, System Security Plan (SSP) and Plan of Action and Milestones (POAM). In addition, this program includes an independent technical review from a subject matter expert (SME) of your completed SSP.

- Provides Training and Consulting
- SME Support and Technical Roadmap for Remediation
- Custom Documentation Creation for CMMC Compliance
- CMMC Management System Support
- CORE Autogenerates your SSP, POAM, and SPRS Score for the DoD database based on your input. Core Business Solutions helps you prepare for your CMMC Certification simply and affordably.
